-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☐ Responsive to communication(s) filed on ____.
- 2a) ☐ This action is **FINAL**. 2b) ☒ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

DETAILED ACTION

Claim Objections

- 1) Claims 6-10 are objected to because of the following informalities:

Claim 6 line 17, "said a flow" should be --a flow--. Appropriate correction is required.

Double Patenting

- 2) The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

- 3) Claims 1-10 rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 1-19 of U.S. Patent No. 6722678.

Although the conflicting claims are not identical, they are not patentably distinct from each other because it is considered inherent that an inertia valve has mass.

- 4) Claims 1-10 rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 1-70 of U.S. Patent No. 6,267,400.

Although the conflicting claims are not identical, they are not patentably distinct from each other because inherent that an inertia valve has mass.

Claim Rejections - 35 USC § 102

5) The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

6) Claims 1-10 are rejected under 35 U.S.C. 102(b) as being anticipated by Isono et al (4572317).

In re claims 1 and 6, Isono et al provides bicycle damper, comprising: a first tube (24) defining a longitudinal first axis; a piston rod (26) supporting a piston (25) in sealed, sliding engagement with said first tube, said piston and said first tube defining a first fluid chamber (24b); a second tube (43) defining a longitudinal second axis, said second axis being non-parallel with respect to said first axis when said piston rod and said first and second tubes are operably mounted to an associated bicycle (please note that the top portion of element 43 is used as the second tube), said second tube defining a second fluid chamber (50); a fluid passage (42) connecting said first fluid chamber and said second fluid chamber, wherein a damping fluid moves between said first fluid chamber and said second fluid chamber in response to relative movement of said piston rod and said first tube; an inertia valve (47) comprising an inertia mass movable between a first position and a second position, wherein said inertia mass blocks a flow of fluid through said fluid passage in said first position and permits a flow of fluid through said fluid passage in said second position.

In re claims 2-5 and 7-10, see figure 3.

Conclusion

- 7) The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Supalla teaches a damper with an inertia valve.
- 8) Any inquiry concerning this communication or earlier communications from the examiner should be directed to Devon C Kramer whose telephone number is 703-305-0839. The examiner can normally be reached on Mon-Fri 8-4.
